***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 37, 41, 44 and 45 are rejected under 35 U.S.C. 102(e) as being anticipated by Gregg et al. '599.

Gregg et al. shows a container apparatus 104A having a container; a recharge container apparatus 104B having a container and discussed in column 8, lines 18-22; gas source discussed in column 13, line 9; purge gas source discussed in column 13, lines 16-40; vacuum apparatus 14 comprising a Venturi; solvent supply discussed in column 8, lines 60-62; vaporizer discussed in column 7, lines 50-53; and the joints or connections are seen in Figures 4A-6M.

***Allowable Subject Matter***

3. Claims 38-40, 42 and 46-56 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claim 43 is allowed.

***Response to Arguments***

5. Applicant's arguments filed 4/17/2007 have been fully considered but they are not persuasive. Applicant contends that Gregg does not disclose separate gas sources and connectors. The claims do not require separate sources. As the single source performs both functions, the claimed limitations are met. Further, there are separate connections for the different gas functions as clearly shown and discussed by Gregg (see the cited passages above).

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

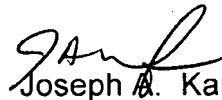

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
